1 Game Grid

PLAY

Players determine which will go first. Player 1 draws a line—vertical or horizontal—connecting any two previously unconnected, adjacent phones, sounding each as line connects with it (cf. Pronunciation Key). Player 2 then connects any 2 phones & sounds those. Play continues as such, with each player competing to complete boxes by adding the 4th wall.

When a player completes a box, that player traces box's 4 walls in a victory lap-of-sorts, sounding all 4 phones. Said player draws a circle within newly completed box & adds unique, identifying initial or mark to center of circle, staking claim to square. Player then takes another turn connecting & sounding. Player's turn continues as long as a box is completed with each new turn.

Play ends when all phones are connected.

Player with most squares claimed wins. In a draw, advantage: Player 2.

VARIATIONS

Play simultaneously with other pairs. Vary game grid selection across group.
